

CLEAN 2430

Experience long bath life and energy saving, low temperature cleaning with TRIM® CLEAN 2430.

TRIM CLEAN 2430.

- Excellent removal of straight oils and soluble oil coolants
- Rapid splitting of oil content for easy removal and bath life extension
- Very low foaming over 97°F (36°C) for energy saving
- Near-neutral pH and multi-metal capability
- Provides 1-2 weeks of indoor corrosion inhibition

CLEAN 2430. Performance proven.

- A manufacturer of heavy truck wheel hubs needed a product that would not foam, even at low temperatures, in their multi-stage washer system. The coolant they were using was washing a lot of foam into the system. Then they switched to CLEAN 2430. It provided the cleaning and rust inhibition—for parts being shipped cross-country—they needed, and solved the foaming problem.
