

**CLEAN 3011**

**Save energy and eliminate residue problems washing aluminum, steel, and cast iron parts with **TRIM® CLEAN 3011.****

**TRIM CLEAN 3011.**

- Super low foam at very high spray pressures—even at room temperature
- Removes chips, dirt, coolants, and residues
- Dries spotless and residue-free
- Provides 2–3 weeks of indoor corrosion inhibition
- An excellent leak-test fluid

**CLEAN 3011. Performance proven.**

- One of the world's leading motorcycle manufacturers was having problems with residue on air-cooled cylinders after washing off a light honing oil. CLEAN 3011 completely removed the oil and cured the residue problem.
- A major automotive engine plant wanted a single cleaner formula to wash blocks, heads, cranks, and other internal engine components. In addition to being compatible with aluminum, steel, and cast iron, the product had to be residue-free and provide several weeks of indoor RP. CLEAN 3011 met the challenge and is now the only spray washing compound used in the plant.
