

# CLEAN 2115AL

## High pressure spray wash aluminum, zinc, and copper castings with **TRIM CLEAN 2115AL**.

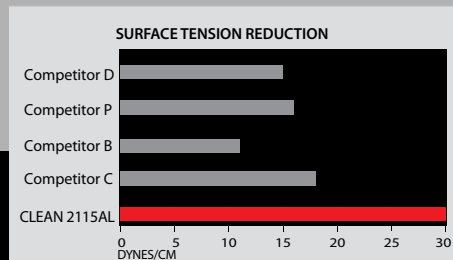

### TRIM® CLEAN2115AL.

- For high pressure washers up to 10,000psi (690 bar)
- Won't darken or smut sensitive aluminum alloys, such as 300 series die cast
- Tolerates high levels of contamination without foaming – extends bath life
- In-plant rust inhibition of ferrous parts up to a week
- Mild pH, no phosphates

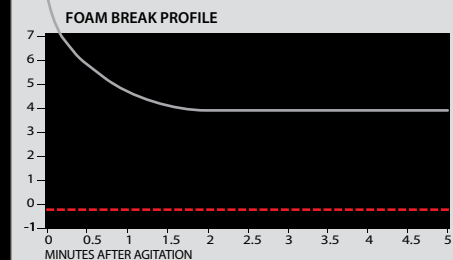

### CLEAN 2115AL. Performance proven.

- A major OEM aluminum, automotive engine manufacturer converted high pressure washers to CLEAN 2115AL. Longstanding problems with staining and residues disappeared; sump life went from three weeks to more than seven months.
- A leading international braking systems manufacturer was experiencing staining and smutting on cast aluminum brake calipers in their 5,000psi (344 bar) spray washers. Changing to CLEAN 2115AL eliminated staining and provided extremely long sump life with minimal makeup.

*CLEAN2115AL outperforms other major "extra high pressure" cleaners*

*CLEAN2115AL is virtually nonfoaming, while another major brand produces substantial foam*
