**MASTER CHEMICAL INTRODUCES TRIM<sup>®</sup> E917, A LOW-FOAM, HIGH-LUBRICITY SOLUBLE OIL**

PERRYSBURG, Ohio, Nov. 6, 2004 – Coolant management innovator Master Chemical Corporation introduces TRIM<sup>®</sup> E917. A general purpose soluble oil designed to maximize the productivity of the newest CNC machine tools that utilize high-pressure, high-volume, through-the-tool coolant systems. TRIM E917 is a low-foam, high-lubricity soluble oil which requires minimal maintenance in even the most demanding fluid management systems. TRIM E917 features a very stable formula for long operational life and consistently high performance with broad applications in machining and grinding on a range of materials. Applications include production surface and centerless grinding, heavy-duty broaching, gear hobbing, and surface, pocket, and thread milling.

“The stable and predictable performance of TRIM E917 makes it a first choice for high-quality, consistent parts manufacturing,” says Andy Nelson, Product Manager. “In high-speed turning and milling, it has the right balance of cooling and lubrication to provide good tool life and surface finishes.”

*(more)*

This highly effective product, with its fine particle size emulsion, helps reduce carryoff and facilitates getting fluid to the point of cut. Other benefits include low foam and low mist, making it an ideal choice for high-pressure, high-volume coolant systems. TRIM E917 protects machine and tool surfaces while preventing sticky ways, chunks, tool holders, and fixtures. The coolant is easily removed with water, working solutions, or aqueous cleaners for easy recycling.

Master Chemical Corporation was founded on November 13, 1951. Since then, working closely with the worldwide metalworking community, Master Chemical Corporation has developed and marketed a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventatives all under the TRIM<sup>®</sup> Brand trademark. These products are both environmentally sound and when used in conjunction with Master's XYBEX<sup>®</sup> Coolant Recycling Systems, are the most durable and stable products available anywhere today.
