

Crank it up a notch or two

Major manufacturers of camshafts and crankshafts worldwide are discovering TRIM® C270 is the premiere grinding fluid.

Your reputation for quality is on the line every day. So is ours. And we'll stake our reputation as industry leaders to guarantee that TRIM® C270 backed up with our team of grinding experts can improve your overall manufacturing process AND dramatically reduce your costs. Global manufacturers of camshafts/crankshafts have used C270 more than five years with significant results.

PROVEN COST SAVINGS

Don't just take our word for it.

The toughest tests of all—those of our customers—have put C270 up against our global competitors. Their unanimous conclusion: C270 is unquestionably the superior grinding fluid. And a full battery of toxicological tests at independent laboratories confirm C270 is nonirritating and nontoxic.

Major users of C270 include:

Typical applications include CBN and conventional grinding of:

- main journals
- lobes
- ends
- crankpins

C270 is formulated to perform with all camshaft and crankshaft materials:

- cast iron
- hardened steels
- powdered metal alloys

Crank-up your performance
